

PIYUSH YADAV

Kolkata — +91 6306867316 — piyushyadavrajyadav@gmail.com — github.com/piyushrajyadav —
linkedin.com/in/piyushrajyadav

Full-Stack Software Engineer / Backend Engineer with experience building scalable web applications, RESTful APIs, and production-grade AI and voice systems used by **20K+ users**. Strong in React, Node.js, Spring Boot, SQL databases, and generative AI integration.

SKILLS

Programming Languages: JavaScript, Python, Java, C++

Frontend: React.js, Next.js, HTML, CSS

Backend: Node.js, Express.js, Spring Boot, FastAPI

Databases: MySQL, PostgreSQL, MongoDB, Redis

AI: LLM Integration, LangChain, LangGraph, RAG, Voice AI Systems, Prompt Engineering, Multi-Agent Orchestration

DevOps / Cloud: Docker, Kubernetes, CI/CD, Linux, Git, Cloud Deployment (GCP, AWS)

Core CS: Data Structures and Algorithms, OOP, System Design, Operating Systems, Computer Networks

CORE COMPETENCIES

Full-Stack Development — Backend Engineering — RESTful API Design — Scalable System Architecture —
Microservices — Authentication and Authorization — High-Performance Web Applications — Database Design and
Optimization — Cloud-Native Applications — DevOps Fundamentals — Agile Development — Production Debugging
— Conversational AI and Voice Systems — AI System Integration — Data Structures and Algorithms

PROFESSIONAL EXPERIENCE

Vaiu AI

Feb 2026 – Aug 2026

AI Engineer (Intern) — FastAPI, LangGraph, LiveKit, GCP, Text-to-Speech/Speech-to-Text

Remote

- Contributed to a statewide voice agent for Bihar Power Distribution Corporation that handles thousands of calls daily, improving response latency and building the caller phone-number identification feature.
- Supported the migration of core voice-agent services from a monolithic setup into a microservices-based architecture.
- Built the agent-creation feature for Ooum.ai, letting users generate a voice agent by pasting a website URL, adding prompt instructions, and uploading reference documents.
- Contributed to a centralized operations dashboard tracking latency, call volume, and server health across client deployments.

Alphaxine Solutions

Mar 2025 – Present

Software Engineer (Intern) — React, Next.js, Spring Boot, MySQL, Docker

Kolkata

- Orchestrated end-to-end development of a production ERP suite (HR, CRM, Projects, Ticketing, Vendor, and Finance modules) serving **500+ employees** across multiple client organizations in a multi-tenant SaaS environment.
- Architected and governed **400+ REST APIs** with authentication, authorization, validation, and error-handling standards.
- Streamlined master-data and schema design, improving data integrity and scalability by **40%**.
- Collaborated in Agile sprints, code reviews, and CI workflows to ship production-ready releases.

Gorjag Infotech Solutions

Jul 2025 – Sep 2025

Web Developer (Intern) — React, Next.js, Node.js, MongoDB

Remote

- Delivered **10+** full-stack modules for a high-traffic web platform.
- Accelerated page load time by **28%**, enhancing UX for **20,000+ active users**.

PROJECT EXPERIENCE

DropFade — Secure File Sharing Platform

Next.js, Node.js, Redis, Cloudinary

- Engineered a privacy-first file sharing system where each file is accessible exactly once and permanently deleted after access, backed by expiring-token authorization with server-side enforcement.
- Streamlined I/O paths using Redis caching, accelerating file access by **35%**.
- Sustained bursts of **1,200+ requests/min** and onboarded **500+ users**; ranked **Top 20 on ProductHunt**.
- Deployed as a cloud-ready SaaS with stateless APIs and fault-tolerant backend design.

Yantrika AI — Automated Software Development Platform

Next.js, FastAPI, CrewAI, Docker

- Architected a SaaS platform that simulates a small dev team through multi-agent orchestration, where a user submits a project idea and receives a PRD, system architecture, production-ready code, and a test suite, each generated by a dedicated CrewAI agent (Product Manager, Architect, Developer, QA Tester).
- Integrated a high-throughput inference engine to keep end-to-end generation under **3 seconds**; added JWT-based authentication, password hashing, and a FastAPI REST layer, all containerized with Docker.

EDUCATION

Institute of Engineering and Management

B.Tech in Computer Science

2023 – 2027

Kolkata
